The screenshot shows the 'Gmail New Mail Alarm' application window. It features a configuration section on the left for a Gmail account, including fields for 'Login ID' (technocom.soft@gmail.com) and 'Password'. Below these are checkboxes for 'Play Sound', 'Save Gmail Account', and 'Start at Windows Startup'. A 'Show New Mail(s)' button is present, followed by a table of new mail notifications. The table has columns for 'From [Name]', 'From [Email]', and 'Subject'. One notification from 'Tanuj Malik' is highlighted. To the right of the configuration is a preview of the selected email, showing the sender's name, email address, subject, and the full message content. The message content is a promotional text for Technocom software solutions.

0 SP 18 (or higher) Host: You need a PC or host that is able to connect to both the SUM ABAP process via HTTP(s) and your SMTP mail server.. It consists of an executable jar file MailNotifierApp.jar and a property file MailNotifierApp.properties. Note that you may have to ask your mail provider to enable SMTP connections. If the Primary Application Server (PAS) host fulfills these conditions, it can be chosen as host for the MailNotifier, but it does not have to be that host.

Mail Notifier latest version: Get email updates in your Windows tray  
Prerequisites Tool: The MailNotifier is part of SUM 1.1.  
How to use MailNotifier: • Choose PC or host and provide it with MailNotifier files  
After extracting the SUM archive, you find the MailNotifier in the folder SUM ABAP mailNotifier..  
MailNotifier in a nutshell: By using MailNotifier, you can now get notified via email when Software Update Manager (SUM) ABAP displays a dialog, so you do not have to frequently check the user interface (UI) during long running phases..  
props You copy both files to your PC or host of choice that fulfills the requirements listed above..  
Get notified about new mails in your outlook.com, gmail, yahoo, email.ru, orange.
