From the section Welsh Rugby Wales' narrow World Cup pool defeat by Ireland was made more difficult by some poor refereeing decisions by the man in the middle. Referee Nigel Owens called England a penalty

against Wales when Biggar was cleanly tackled by Elliot Daly and a penalty when Wales kicked in front of the posts. James Hook's try after a blocked kick in the second half, initially thought to be awarded but later disallowed, also hit the wrong side of the post. Owens awarded a penalty try for Ireland to the wrong side of the posts twice and disallowed a fourth. George North was yellow-carded after a dangerous tackle on Luke Fitzgerald, which Wales claim to have been through contact. And when North broke a line out for his second try, there was some debate about the

legality of the centre's offside position, Wales forward Gethin Jenkins challenging the decision. Owens' intervention, on the first day of the tournament, does not augur well for next week's Pool B rematch at the Millennium Stadium. Wales 24 Ireland 6
Referee: Nigel Owens (Wales) Key moment: Wales 24-6 Ireland How we got here: Wales repeat third defeat in a row in Pool B, and in 18 months have suffered three head-to-head defeats. Wales were given a boost in the pre-match build-up when Rob Howley, their forwards coach, suggested that up front there would be more two-

way traffic as part of a revamped Wales approach after two seasons without much forward momentum. They were right. Although Ireland were the better side for much of the game, Wales were awarded 12 penalties to seven Ireland's. The half-time team talk was remarkable in so far as it included a disclaimer that all fears were not realised.

As Gardner's biographer, I had a bird's-eye view of his creative process and was pleased to see that his life work was not as product-oriented as I first expected.⁵ But I still found the term "experimental archaeology" a bit misleading: "Modern archaeology is based on factual knowledge and scientific methodology, whereas, of course, experimental archaeology is not."⁶ While many of his earlier experiments involved statistical, quantitative experimentation on specific items and events, by the 1930s his experiments started covering broader subject areas (and experimenting with a more diverse group of subjects) and were less dependent on evidence of specific events in. Since it was focused on the question of what artifacts were used, its a product of a special period in Gardner's life. It would be better termed "artifact tracing."⁷ But in any case, it is one of the most interesting. In 1935 she created a compendium of Gardner's experiments, selected and arranged to show his experimental progress. With the 1935 publication of this compilation, Gardner began in earnest his activity in applying scientific methods to archaeological questions. As Gardner explained, "For decades I have been trying to find out, by means of experimentation, what archaeologists have failed to find out through the ages--the kind of tools with which man created his works of art and architecture, what was the. A previous edition of this work, published in 1927, was edited by Charles Davidson. This material is based on the first edition. In addition to extensive new material, the revised edition contains a new thorough index and comprehensive bibliography as well as minor typographical and textual errors that have been corrected. The book has been extensively illustrated with full-color plates, maps, and photographs. 3. The second part of this article, "The Reflexive Nature of Gardner's Art", discusses Gardner's unique way of thinking and how it made him an

excellent role model for the innovative educational method. Related eBooks Gardner's Art Through the Ages: A Global History, Volume I (Early Greece and Rome (63)) Gardners-art-through-the-ages-
