torchlight pet mods torchlight 2 mods A: If you don't want to make a new Pet model and just take a skin that you can find on the Internet, then you could use the mod "Pets To Zen." It modifies the vanilla pet models in the game so that they are obtainable through a fish menu. It was also more reliable and worked great. He is actually teaching me to fix his truck when I am broke enough to buy it. It is a good option if you can't afford a new truck. My experience was much less positive, but not because of the truck. I bought a 2003 SR with GVM2800. It was undercarried with a owner that was dishonest with me and didnt provide options for the aftermarket gaskets for the trans. Im talking 1000\$ in parts. I was trapped due to a power steering leak that wasnt diagnosed and GVM2800 wasnt fixing as a company. I am mad at them for that and do not want to think about ever buying there again. It is a nice truck. i have 1.5T and im looking into that truck right now. im in the process of saving up for it and plan on trading in my lokar for it. the only problem is we are talking about a good 5k from my present truck to be bought and the cost of the sr500 is 4k less.
